

WILA 12

Guidelines for pre-recorded presentations and posters

1. Presentations

What kind of video can I submit?

- A narrated powerpoint, a video of yourself speaking or a combination of the two.
- The length of the video of your presentation should be **20 minutes**. Please do not exceed the time with more than 2 minutes. Recordings which are longer will be returned for editing.
- Please ensure that you have enabled captions (subtitles) to increase accessibility. These can be automatically generated in PowerPoint and Zoom.

Which file formats can I use?

You can use the following formats:

- mp4, .m4v (MPEG-4)
- .mov (QuickTime)
- .avi
- .mpg
- .ogv (Ogg)

2. Posters

Please prepare a PDF of your poster presentation. Keep in mind that these will be studied on screen, so a horizontal format is preferable.

3. General

The deadline for uploading the video or the poster is September 26, 2021 to give us time to watch and review all videos, and organise the online conference space.

Where should I send/upload my file?

The lead author of each paper will receive an invitation to a service through which you can send your video to the organizers.

How should I name my file?

Please name your file with the title of your paper.

Who will be able to see my video or poster?

The links to the videos and poster PDFs will be made available for the registered participants. Anyone with a link will be able to access them, but we will ask participants not to distribute them.
